

So far, I have taught the following courses.

Courses for graduate students in the mathematical Ph.D. programs:

- Complex Analysis I & II
- Real Analysis I & II
- Dynamical Systems

Courses for graduate students in the middle or secondary high school teachers' programs:

- Abstract Algebra
- An introduction to Probability and Statistics
- Elements of Numbers
- History of Mathematics

Courses for undergraduate students:

- Mathematical Modelling
- Chaos in One-dimensional Dynamical Systems
- Partial Differential Equations
- Ordinary Differential Equations
- Analysis of One Complex Variable
- Foundations of Geometry
- Abstract Algebra I
- Advanced Calculus I and II
- An introduction to proofs
- Probability and Statistics
- Seminar in Problem-Solving
- History of Mathematics
- Calculus I, II & III
- Honors Calculus I & II
- Elements of statistics
- Pre-calculus
- College Algebra
