Organic I Recitation Handount 3 (9/17, 9/19, 9/24)

1) Show all of the resonance forms of the following molecules, and use arrows to show their interconversion.

2) Predict a product of the following acid/base reactions and show an appropriate mechanism a)

b)
$$H_2N^{\bigcirc} + H_2O \longrightarrow$$

4) Predict and rank the relative stabilities of the following cations.

5) Predict the product(s) of the following substitution reactions and show a mechanism.

MeOH
